

Elbow and Shoulder

Course Overview:

This workshop will enable the delegate to undertake a detailed assessment of the shoulder, upper arm and elbow, request appropriate investigations and identify the differential diagnoses.

Who should attend:

- Nurses
- Paramedics
- Junior Doctors
- Advanced Practitioners

Course Content:

An overview of the anatomy of the shoulder and elbow and in depth assessment of the shoulder and elbow including:

- Bones
- Muscles
- Tendons
- Neurovascular function
- Diagnostic requests

Common injuries/conditions relating to the shoulder and elbow and subsequent treatment will also be covered including:

- Fractures
- Rotator cuff injuries
- Tendonitis

The course also includes an interactive workshop. This offers the delegate the opportunity to review case studies, undertake practical physical examinations identifying requirements for diagnostic tests and referral onto definitive care, treatment or discharge.

This will offer the delegate practical 'hands on' experience with supervision and feedback from the course facilitator.
