

Hand and Wrist Assessment

Course Overview:

Hand and wrist injuries form a large part of the practitioners workload within emergency/unscheduled care. This workshop will enable the delegate to undertake a detailed assessment, request appropriate investigations, identify the differential diagnoses and initiate treatment where appropriate.

Who should attend:

- Nurses
- Paramedics
- Junior Doctors
- Advanced Practitioners

Course Content:

An overview of the anatomy of the hand and wrist and history taking and documentation. An in depth assessment of the hand and wrist including:

- Bones
- Muscles
- Tendons
- Neurovascular function
- Diagnostic requests

During the afternoon an interactive workshop will offer the delegate the opportunity to review case studies, undertaking practical physical examinations identifying requirements for diagnostic tests and referral onto definitive care, treatment or discharge. X-ray interpretation will be incorporated into the case studies. This will offer the practitioner practical 'hands on' experience with supervision and feedback from the course facilitator. This study day may be taken individually or followed by the 'Diagnosis and Treatment' day which covers the treatment of hand injuries in greater depth.
