

Neck, Back and Hip

Course Overview:

This workshop will enable the delegate to undertake a detailed assessment of the neck, back and hip.

Following completion, the delegate will be able to identify the need for and request appropriate investigations. This will also enable the individual to identify the differential diagnoses and 'red flags'.

Who should attend:

- Nurses
- Paramedics
- Advanced Practitioners

Course Content:

Overview of the anatomy of the neck, back and hips.

In depth assessment of the neck, back and hips including:

- Bones
- Muscles
- Tendons/reflexes
- Neurovascular function
- Diagnostic requests and tests including international radiological guidelines
- Identification of 'red flags'

Common injuries/conditions relating to the neck, back and hips and subsequent treatment will be covered including:

- Soft tissue conditions of the neck eg torticollis,
- Mechanical lower back pain
- Self care physiotherapy

The course contains an interactive workshop. This offers the practitioner the opportunity to review case studies, undertake practical physical examinations identifying requirements for diagnostic tests and referral onto definitive care, treatment or discharge.

This will offer the practitioner practical 'hands on' experience with supervision and feedback from the course facilitator.
